Project Planning Phase:

Agile Story Points – Laptop Request Catalog Item

Story Points:

A Story Point is a unit used in Agile development to estimate the effort and complexity of a task. Typically assigned using the Fibonacci sequence (1, 2, 3, 5, 8...), where:

1 Point = Very simple task

2 Points = Simple task

3 Points = Moderate task

5 Points = Complex task

8+ Points = Very complex/multi-day task

Breakdown of Tasks by Sprint:

Sprint 1: UI Configuration and Setup

Task	Story Points
Create Update Set	1
Design Catalog Item with Variables	2
Implement UI Policies	3
Add UI Action (Reset Form)	2
Test Form Behavior	2
Total for Sprint 1	10

Task Story Points

Create Update Set 1

Design Catalog Item with Variables 2

Implement UI Policies 3

Add UI Action (Reset Form) 2

Test Form Behavior 2

Total for Sprint 1 10 Points

✓ Sprint 2: Workflow Automation and Notifications

Task Story Points

Configure Approval Flow using Flow Designer 5

Add Notifications to Users and Approvers 3

Export & Import Update Set 2

Fine-tune UI and Flow Conditions 2

Conduct Full Testing 3

Total for Sprint 2 15 Points

✦ Total Story Points = 25

Sprint 1: 10 Points

Sprint 2: 15 Points

Velocity (if calculated over 2 sprints):

→ $25 \text{ Points} \div 2 \text{ Sprints} = 12.5 \text{ Story Points/Sprint}$
