Data flow diagram

TEAM ID	LTVIP2025TMID28546
PROJECT NAME	Laptop-Request Catalog Item

What is data flow diagram:

- o A graphical representation of how data moves within a system.
- o Shows how input is transformed into output through various processes.
- o Represents processes, data stores, data flows, and external entities.
- o Uses standard symbols: Arrows for data flow

Purpose:

- o Visualize the flow of data in a system clearly and simply.
- o Break down complex systems into manageable sub-processes.
- o Help in understanding system functionality at different levels.
- o Serve as a blueprint for system development and process automation.
